

UTMA-workshop 2022

28–29 November, [Clasonsalen, Akademihotellet, Uppsala](#)

Welcome to the final UTMA-workshop. This has been a lovely project, which has resulted in an array of new materials, papers, data, various kinds of analyses, film, music, and a neat little research infrastructure in archaeobotany, and most importantly new friends in research. Now it is time to meet and wrap up, although a series of papers still are in the draft stage and some studies are still ongoing. It is however important to maintain the network and initiate new discussions on how we will continue to contest notions of marginality in outland research. Therefore, the workshop will be organised around three general sessions, in the first session some of the main outcomes of UTMA will be highlighted, in the second session we will gain insights to ongoing UTMA work and in the final session we will focus on current and future research on margins, peripheries and outlands, theories and methods.

Welcome!

Kalle and Petter
